

Job Description

**Jr. Software
Development Engineer
(Frontend)**

www.sciative.com

About Sciative :

Sciative is a SaaS product company that empowers large brands, retailers and travel companies to optimize their pricing strategies and maximize revenue, set on a course to soon achieve Unicorn status.

India's first AI-powered dynamic pricing company, that cuts across Retail, Travel and Hospitality industries.

Vision

Be the Gold-Standard of Right Pricing for every market, every customer, every transaction

Travel

Dynamic pricing and price optimization for luxury intercity buses and airlines.

Retail

Discount optimization for retailers, brands and ecommerce companies.

Hotels

Market intelligence and pricing for hotels, resorts, and bnb across the globe.

What you will do as a Jr. Frontend Software Developer?

- Craft responsive, high-performance front-end applications using React / Angular / Vue.js.
- Translate beautiful UI/UX designs into interactive experiences for global clients.
- Collaborate with backend developers to integrate with AI-powered RESTful APIs.
- Build real-time data visualizations that bring clarity to complex business insights.
- Write clean, scalable, and maintainable code following best practices.
- Optimize performance for speed and responsiveness across devices and browsers.
- Own the debugging, testing, and documentation processes.
- Contribute to design and architectural discussions with cross-functional teams.
- Stay current with emerging trends in frontend development and AI tech.

What you should possess to get this role?

- Proficiency in HTML5, CSS3, JavaScript, jQuery and modern frameworks like Django, React, React Native, Vue.js.
- Experience with data visualization tools like D3.js, Chart.js, Highchart; Library like datatable.
- Knowledge of responsive design, performance optimization, and cross-browser compatibility. - Knowledge working on core web vitals.
- Should have experience in building SEO-friendly websites with a basic understanding of SEO principles and best practices.
- Familiarity with Git, frontend testing frameworks (Jest, Enzyme), and CI/CD pipelines.
- Strong collaboration skills and a user-first design mindset.

Who can apply?

Education:
B.E / B.Tech in Computer Science / IT/EXTC

What you will get from this job?

Startup-Environment

Expect full momentum. Quick pace of learning. Opportunity that you will never get at an MNC. Create a positive impact in the company and industry. Pressure to success.

Performance-Mindset

Quest towards excellent work deliverable will make you into an all rounded professional. You will be 1 in a few, rather than 1 in 1000s.

Mentorship Culture

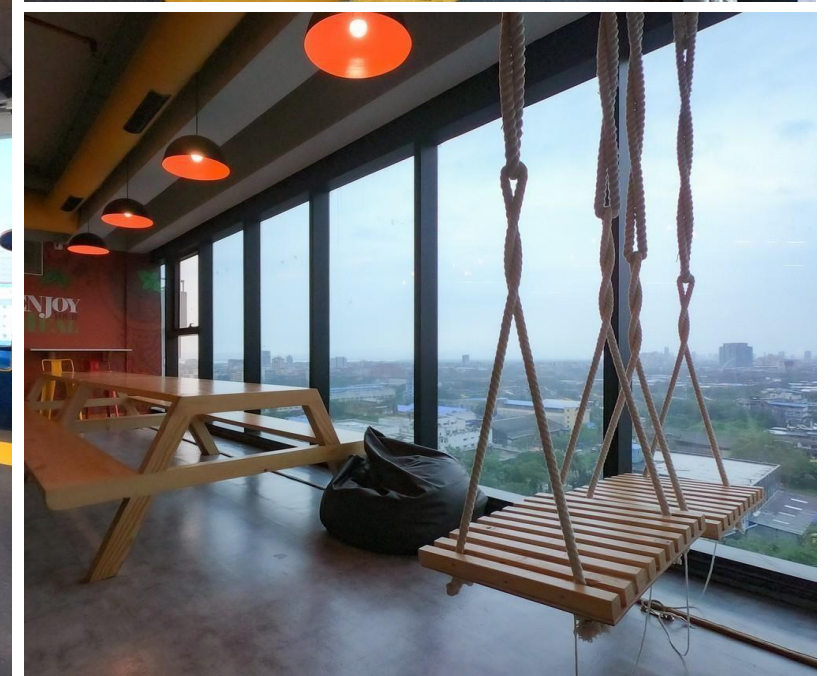

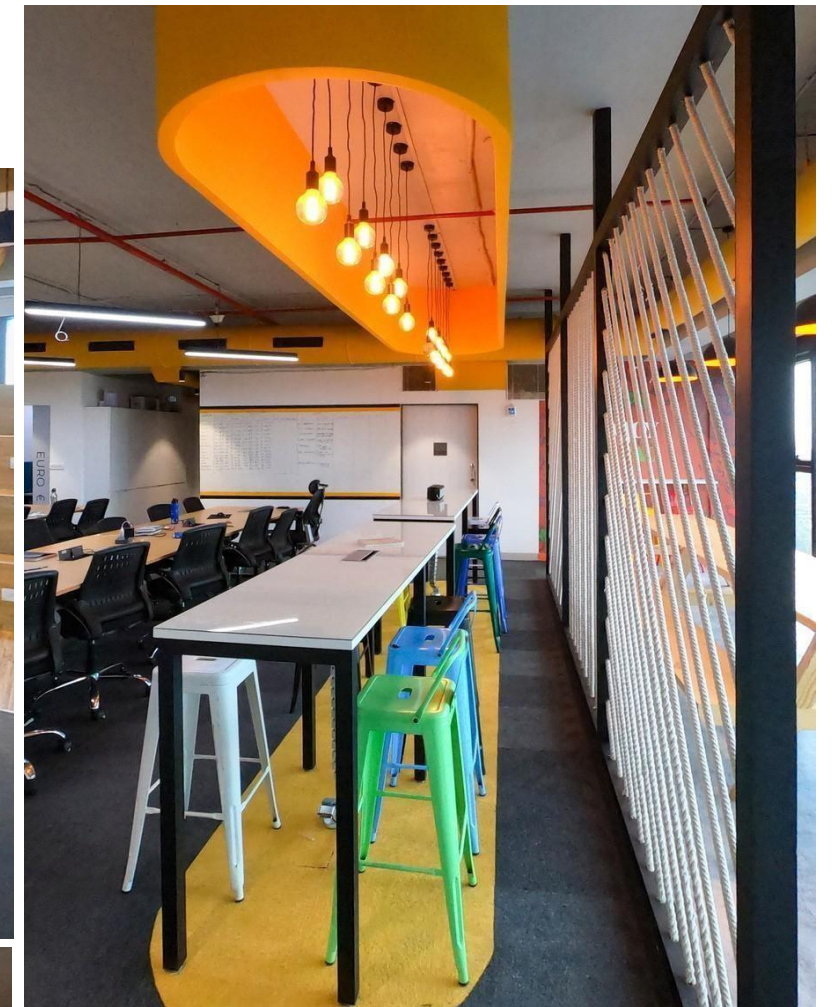

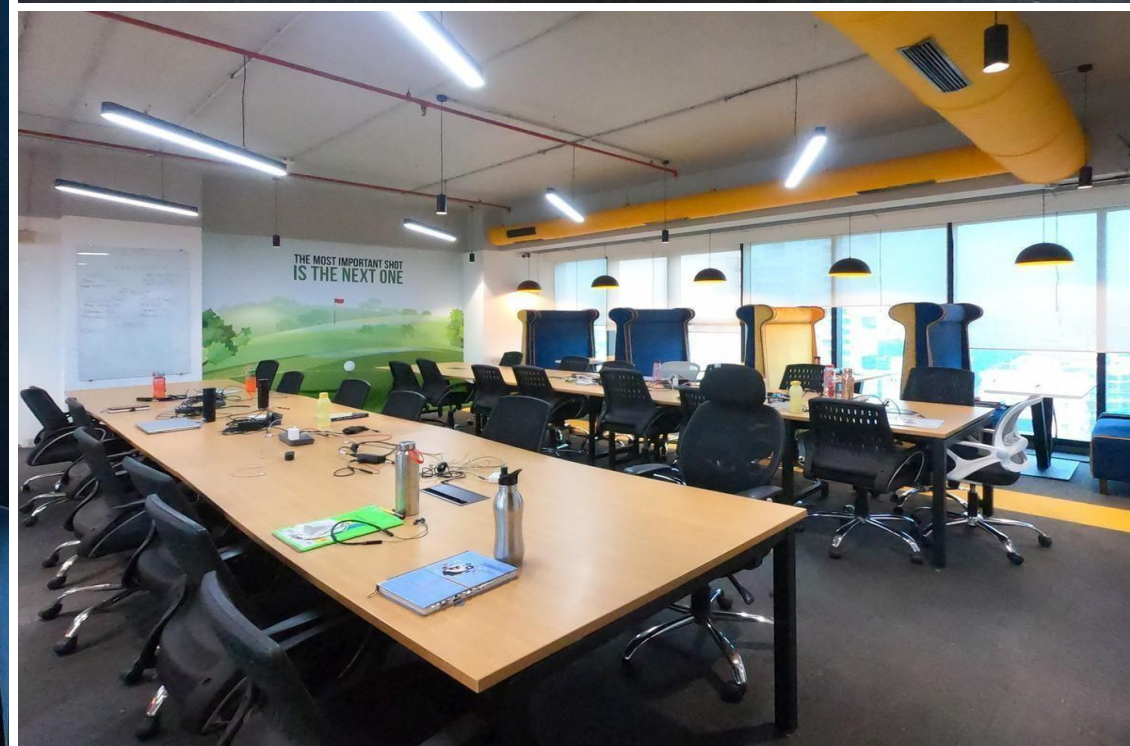

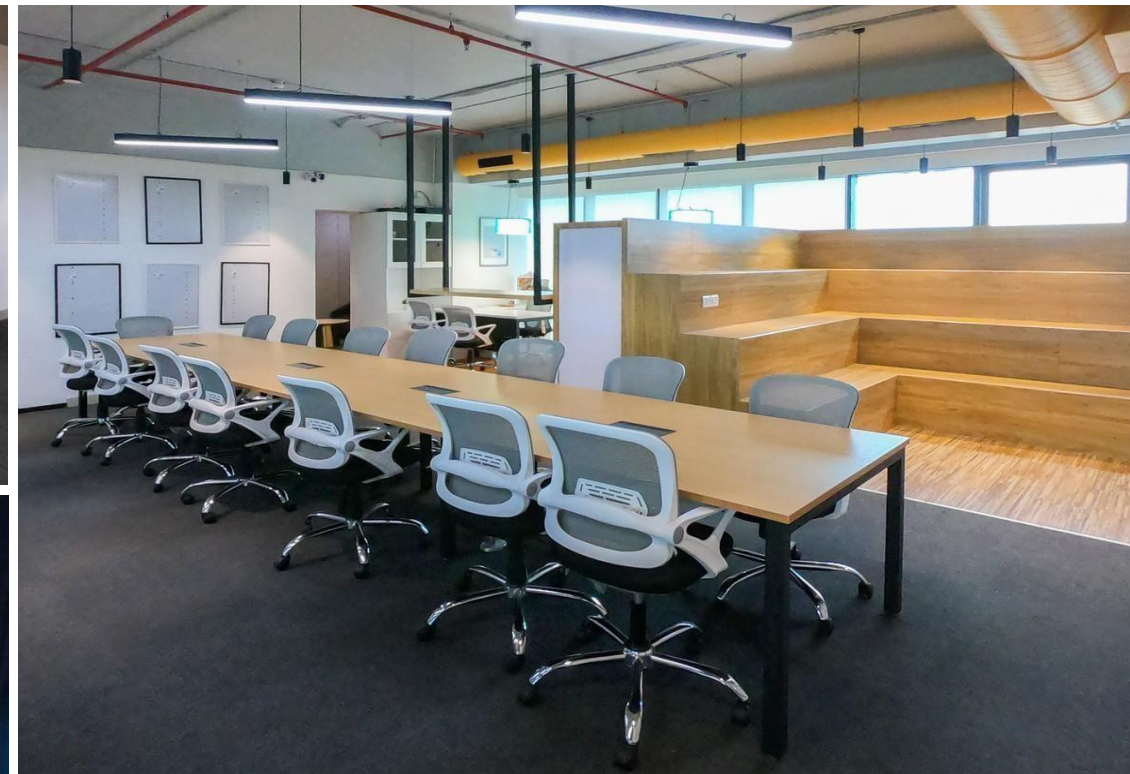

Management team closely interacts with you. Learn and get mentored by seniors directly. Seniors are young, energetic with latest industry acumen and knowledge.

Secure Job

Sciative is an established and profitable startup. It ensures timely salary disbursements, and job security for all its employees.

Where you will work:

Navi Mumbai,
Maharashtra.

"At our core, we believe in working hard and celebrating harder—with every milestone, trip, and team outing turning into unforgettable memories."
